

SMART66 Electric Pizza Oven

- Six 12" Pizzas per deck.
- Maximum temperature 450°C
- Safety Thermostat
- Internal Dimensions – d x w x h 990 x 660 x 150 per deck.
- 9kw Single phase convertible to three phase onsite.
- External dimensions – d x w x h 1160 x 980 x 750.
- Weight 218 kg

The SMART66 pizza oven comes with refractory brick bases for heat retention and even cooking, dual thermostats and a separate temperature gauge per chamber for total cooking control. Made in high grade stainless steel and with thermal insulation to reduce start up times and minimise heat loss, standard with door window and interior light to each chamber.

Heavy duty stand sold as accessory.
